## Black & White Collection One

Camera Body:  
Nikon D70, D300S

Lens: Various

Post Production:  
Lightroom 6 & Nick's  
Silver Efex Pro 2

At a very early age, about 10 years old, I got the photography bug. When, my brother, sister, a friend, and I got our photographs taken by a neighbor, known as Mr. Eric; he used a Twin Len Reflex camera. I did not know then, what it was, but I recall him looking down, the camera held just above his tummy, and about two week later when I saw the photographs I was amazed at seeing myself in print. That experience always stayed with me and when I graduated in 1983 from college, I turned my sights on learning the art of capturing an image on film and later on digital.

Here I am still very much excited by capturing images that catch my eye. Over the years, I have been asked on several occasions what do I like to photographs, and it was only quite recently I have found the words to define "What". I do not specialize in anyone photography specialty as, Wedding or Nature photography, but I specialize in that which captures my interest and then it becomes a process of transferring what I have seen or as Ansel Adams said "Pre-visualize" and capture to digital or film medium.

So here I am, taking another step, and that is presenting to you my works hoping you appreciate and wish to purchase and display in your home or office.

See list below and contact us if you have any questions -
